PORTOFOLIO

Wood and Resin

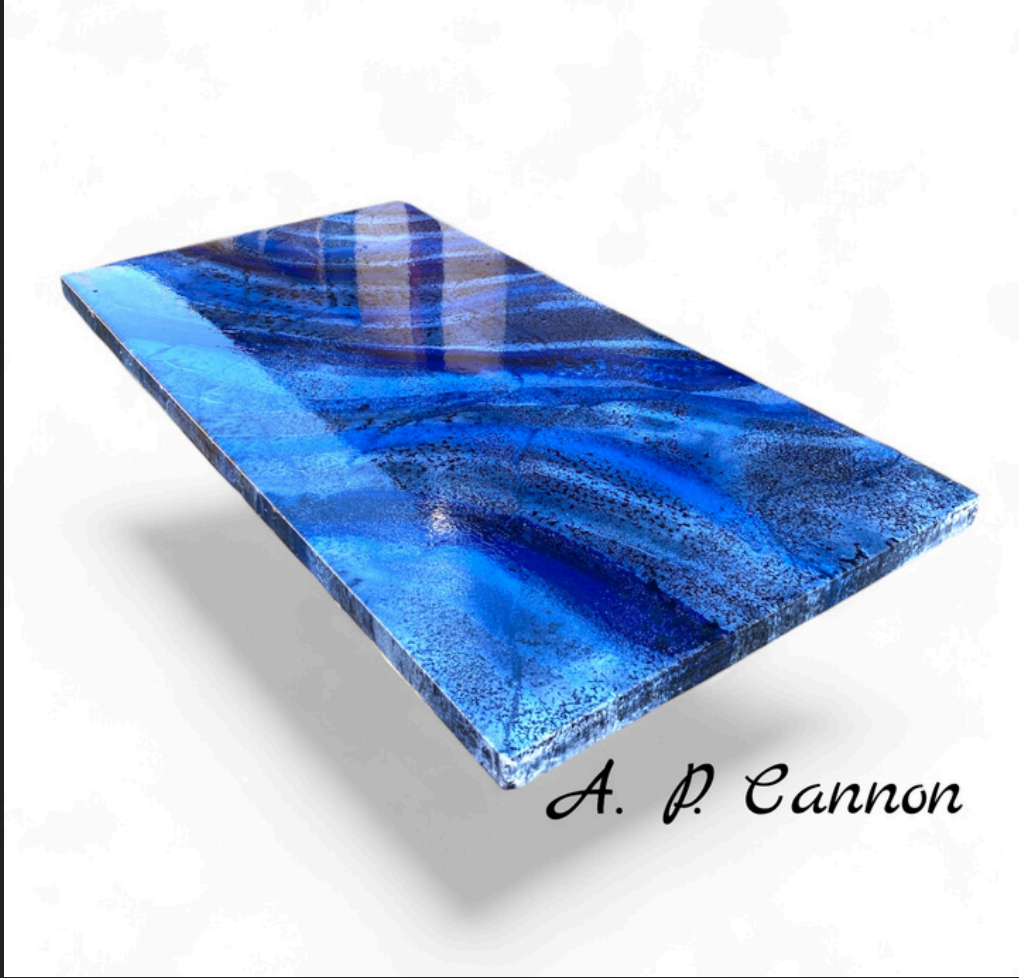

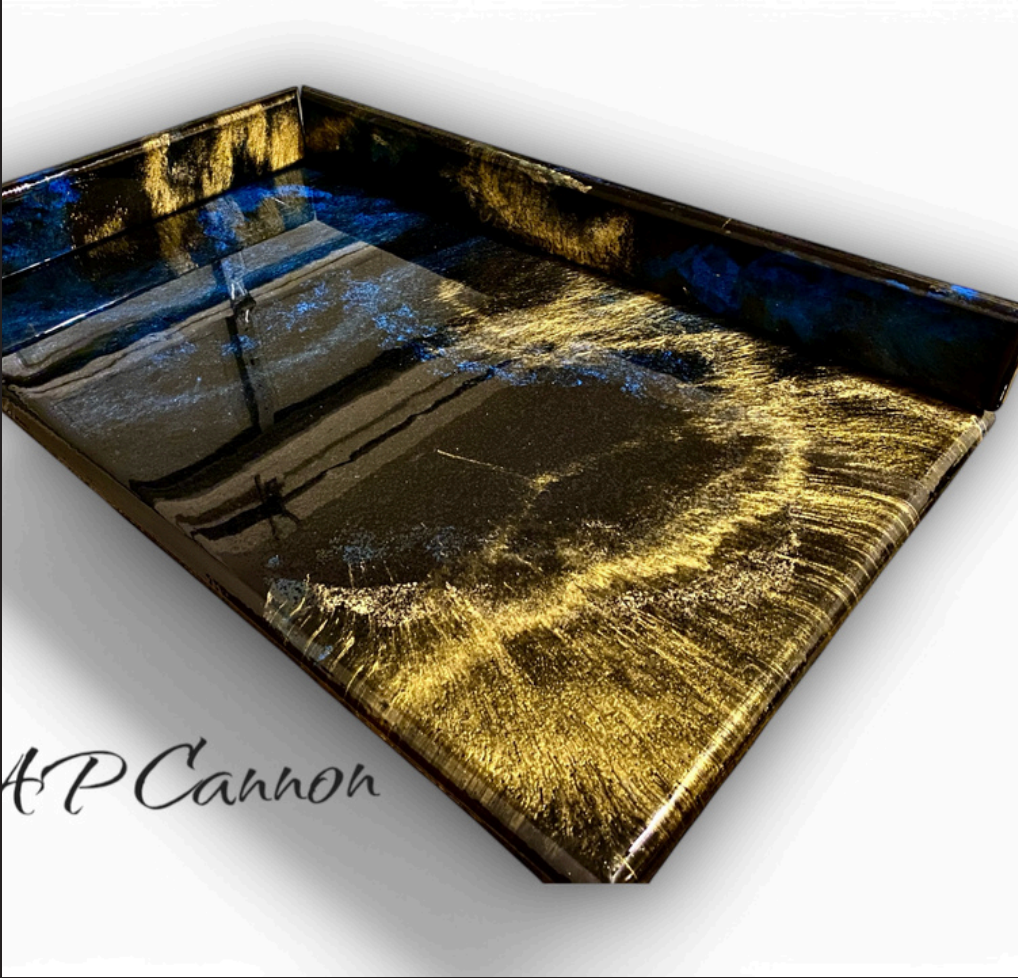

AP Cannon

AP CANNON

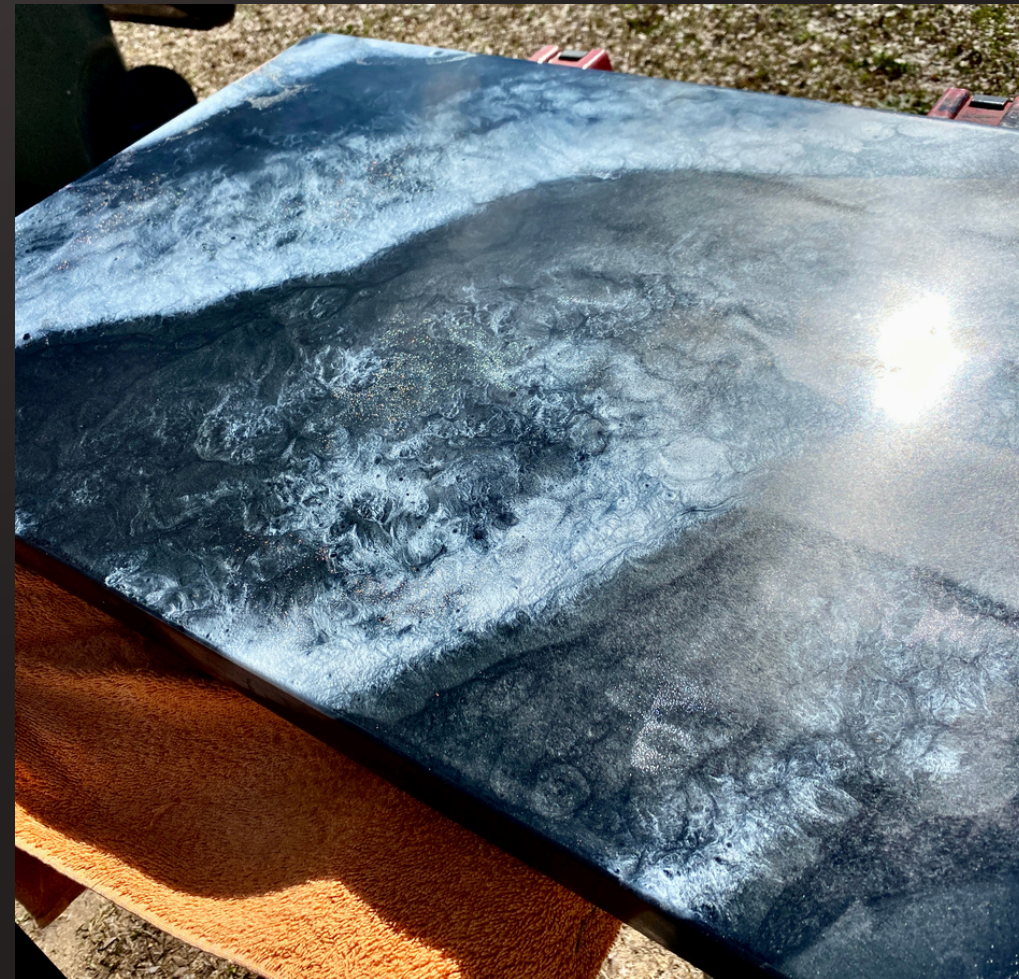

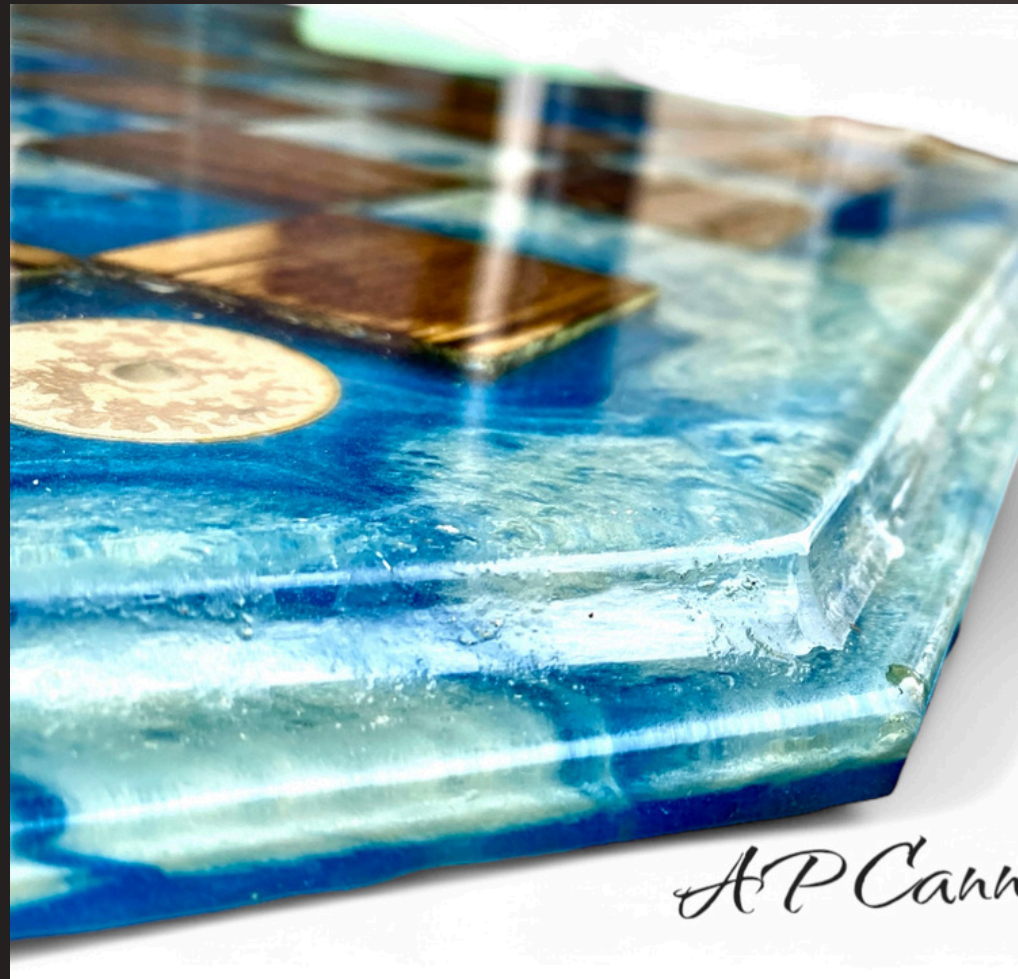

Based in Alex, Oklahoma, I dedicate my time to being a husband, father, and pastor. Crafting is a hobby I love. I am dedicated to working with you and providing quality wood and resin anything. This hobby supplements my ministry and gives me the opportunity to connect with and serve people I otherwise would not meet. I look forward to serving you.

Standard Resin

Standard resin pieces are my most popular product. They comprise an epoxy-resin pour over particle board, can include any pattern design, and people popularly request them to look like stone (marble, quartz, or granite). Standard resin pieces are scratch-resistant, heat resistant, food safe, and water-resistant.

Solid-State Resin

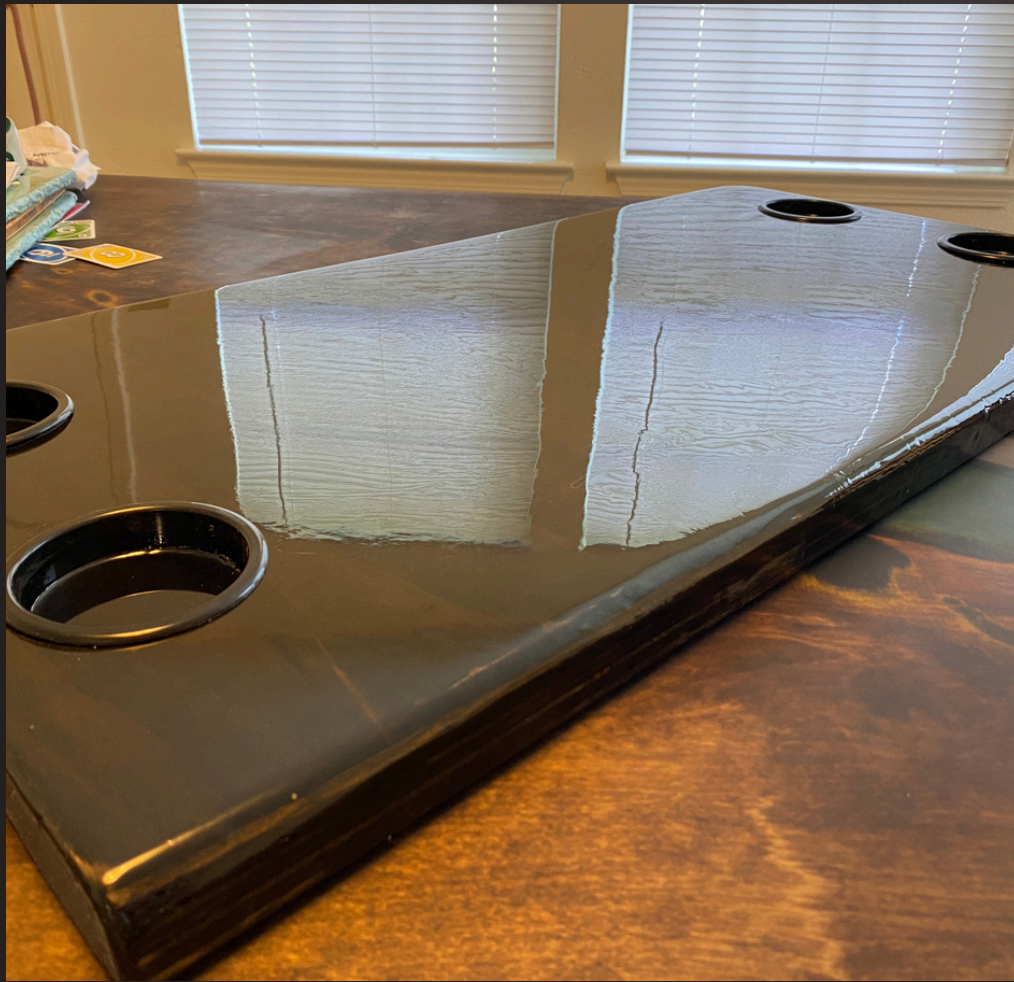

Solid-state resin pieces are more expensive than the standard and are epoxy-resin all the way through. They can include any pattern design, and people popularly request them to look like stone (marble, quartz, or granite). They have smoother edges, are more durable, and heavier. Solid-state pieces are scratch-resistant, heat resistant, food safe, and waterproof.

Natural Wood

Natural wood and resin pieces are the perfect touch for any more natural decorum. They can feature any species. They can also feature live-edges or eased edges. Wood pieces are scratch-resistant, heat resistant, food safe, and waterproof when finished with epoxy. Other finishes are also available.

Add Any Customization or Personalization

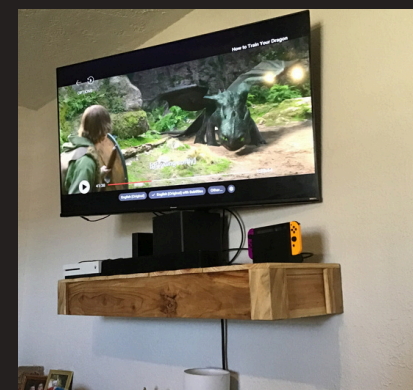

From engraving to cutting sink-holes or cup-holders and making folding RV tables, I am happy to make your piece that one-of-a-kind piece you need.

Make It a Full Furniture Piece

No matter what furniture piece you need, I can make the simple surface you want into a full, beautiful, and functional piece.

Custom Wood and Resin Anything

- Boxes
- Shelves
- Seats
- Benches
- Raised Garden Beds
- Trim
- Backsplashes
- Custom Engraving
 - Laser or Router
- Anything else...

Custom Wood and Resin Anything

Process:

1. Consultation
2. Design and Pricing
3. Build and Finish
4. Ship/Deliver

Custom projects take time, especially since I focus primarily on my pastoral responsibilities. If you are in a hurry or want something cheap and fast, please purchase from someone else. I would rather deliver a quality craft piece.

Thank you for your consideration.

- Andrew
